

## **CONTRACT ACT**

Contract is a legally enforceable agreement, executed between the parties to ensure their performance or promise as per the terms of the Contract; its importance is being increased by day to day. Enforceability of promise made therein is a unique feature of the Contract. Validity of a Contract is a crucial part of any contract; the Contract must be drafted along-with all essential ingredients to save it from losing its enforceability. A contract with an Arbitration clause enables parties to refer their dispute for adjudication before Arbitration Tribunal.

The law office drafts all kind of contracts, and advises in relation to all the issues arising out of Contract. And also provides complete legal assistance including the drafting and appearance before the Court of law in relation to any issue arising out of Contract.
